Shimo-akatsuka Area [Earthquake]

Regional Disaster Prevention Support Section, Itabashi City—March 2026

- This map was co-created by Shimo-akatsuka Area residents and Itabashi City during the 2025 Itabashi City Area-Based Disaster Prevention Manual Workshop.
- To prepare for an earthquake, consider potential earthquake-related hazards in particular. Then, review how to respond to them using disaster relief resources.

Local Disaster Prevention Rules for the Shimo-akatsuka Area

- (Response to those who require special assistance) Check on neighborhoods. Ask for help when needed.
- Build relationships through daily community activities so you can ask for help when needed.

Daily preparations

Check the box when completed.

- [ ] Install a furniture anti-tip kit.
- [ ] Install an earth leakage circuit breaker.
- [ ] Prepare portable toilets and stock a week's supply of food.
- [ ] Receive a building quake-resistance assessment and remove or rebuild any hazardous concrete block walls.
- [ ] Check the locations of street fire extinguishers.
- [ ] Check your nearest evacuation site and evacuation shelter.

In the event of an earthquake

Write down your nearest evacuation site.

◇ If there is a risk of home collapse or fire

Ensure your safety first.
Temporary meeting place
Municipal elementary and junior high schools, nearby parks, etc.

If a major fire occurs
Evacuation site
Big parks, squares, etc.

If your home is uninhabitable
Evacuation shelters, relatives' or acquaintances' homes, hotels, etc.

◇ If your home is habitable ⇒ Shelter in place.

Stock up on food and daily necessities on a regular basis to stay safe at home.

In the event of an earthquake directly beneath the eastern part of Tama, the assumed seismic intensity in the Shimo-akatsuka Area would be **lower 6 to upper 6.**

This map uses data provided by Itabashi City. However, due to limitations in data accuracy, there may be differences between actual locations and those shown on the map.

This map is based on the latest data provided by the City at the time of its creation. Information on the map may differ from current conditions in some areas.

This map was created with modifications to the Fundamental Geospatial Data (basic items) issued by the Geospatial Information Authority of Japan.

Earthquake Hazards

■ Ground (Collapse)

Earthquake-prone ground along former riverbeds
Areas with steep slopes

■ Buildings (Fire and Collapse)

Dense wooden urban areas
Aging wooden houses and vacant houses
Concrete block walls and high walls
Large glass windows on buildings (falling)
Apartment buildings (interference with daily life)

■ Roads (Blockage and Traffic Interruption)

Narrow roads
Dead ends
Slopes and sharp curves
Crossroads with limited visibility
Utility poles and railroad crossings
Congestion on arterial roads (e.g., Shin-Omiya Bypass)
Vehicle inflow from expressways
Congestion on local loads (e.g., Shogetsuin-dori St.)

Neighborhood/residents' association area — Shimo-akatsuka Area

There are fire hydrants, fire water tanks, street fire extinguishers, and fire hydrant manholes throughout the town. To prepare for fire following an earthquake, check their locations and review how to use them.
