いたばし防災一ー プラス Map

Shimizu Area
[Earthquake]

Regional Disaster Prevention Support Section, Itabashi City—March 2026

- This map was co-created by Shimizu Area residents and Itabashi City during the 2025 Itabashi City Area-Based Disaster Prevention Manual Workshop.
- To prepare for an earthquake, consider potential earthquake-related hazards in particular. Then, review how to respond to them using disaster relief resources.

Local Disaster Prevention Rules for the Shimizu Area

- Conduct initial firefighting and then confirm everyone's safety.
- Stock a week's (or at least three days') worth of water and food at home.
- Determine during normal times how to provide information in the event of a disaster.
- Communicate with people nearby to assist with evacuation.

Earthquake Hazard Areas

Steep slope

Narrow road

Community Disaster Relief Resources

Evacuation Site
Kirigaoka, Akabanedai, and Nishigaoka Area

Neighborhood/residents' association name	Temporary meeting place
Shimizu Asahi Neighborhood Association	In front of Shimizucho Community Space
Shimizu Neighborhood Association	In front of Shimizucho Daini Community Space
Shimizucho Mutsumi Neighborhood Association	Shimura Daisan Elementary School
Shimizu Miyamoto Mutsumi Neighborhood Association	Shimizu Inari Jinja Shrine, Miyamoto Park, Miyamoto Children's Playground
Shimizu-kita Neighborhood Association	Ohara Daini Park
Hasunuma-higashi Neighborhood Association	Hasunuma Children's Playground
Hasunuma-naka Neighborhood Association	Motohasunuma Park
Hasunuma-nishi Neighborhood Association	Shimura Daisan Elementary School
Ohara-higashi Neighborhood Association	Ohara Park
Ohara-nishi Neighborhood Association	Chotokuji Temple parking lot
Inatsuke Residents' Association	Inatsuke Housing Complex resource collection site

Daily preparations

Check the box when completed.

- ☐ Install a furniture anti-tip kit.
- ☐ Install an earth leakage circuit breaker.
- ☐ Prepare portable toilets and stock a week's supply of food.
- ☐ Receive a building quake-resistance assessment and remove or rebuild any hazardous concrete block walls.
- ☐ Check the locations of street fire extinguishers.
- ☐ Check your nearest evacuation site and evacuation shelter.

In the event of an earthquake

Write down your nearest evacuation site.

◇ If there is a risk of home collapse or fire

Ensure your safety first.
Temporary meeting place
Municipal elementary and junior high schools, nearby parks, etc.

If a major fire occurs
Evacuation site
Big parks, squares, etc.

If your home is uninhabitable
Evacuation shelters, relatives' or acquaintances' homes, hotels, etc.

◇ If your home is habitable ⇒ Shelter in place.
Stock up on food and daily necessities on a regular basis to stay safe at home.

In the event of an earthquake directly beneath the southern part of central Tokyo, the assumed seismic intensity in the Shimizu Area would be **lower 6 to upper 6**.

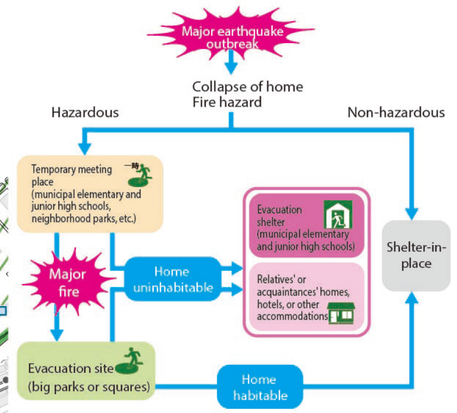

This map uses data provided by Itabashi City. However, due to limitations in data accuracy, there may be differences between actual locations and those shown on the map.

This map is based on the latest data provided by the City at the time of its creation. Information on the map may differ from current conditions in some areas.

This map was created with modifications to the Fundamental Geospatial Data (basic items) issued by the Geospatial Information Authority of Japan.

Earthquake Hazards

■ Ground (Collapse)
- Earthquake-prone ground along former riverbeds
- Areas with steep slopes

■ Buildings (Fire and Collapse)
- Dense wooden urban areas
- Aging wooden houses and vacant houses
- Concrete block walls and high walls
- Large glass windows on buildings (falling)
- Apartment buildings (interference with daily life)

■ Roads (Blockage and Traffic Interruption)
- Narrow roads
- Dead ends
- Slopes and sharp curves
- Crossroads with limited visibility
- Utility poles
- Congestion on arterial roads (Nakasendo)
- Vehicle inflow from expressways
- Footbridges over arterial roads (collapse)
- Congestion on local loads (Hasunuma Athlete Rd.)

Neighborhood/residents' association area — Shimizu Area

There are fire hydrants, fire water tanks, street fire extinguishers, and fire hydrant manholes throughout the town. To prepare for fire following an earthquake, check their locations and review how to use them.
